

The Galton HR-3002 Platform Scissor Lift

Lifts 3000 kg to 1.83 metre

240v single phase power

Complete with Ramp Extensions

3 phase motor available

Full standing access

Lifts vehicles off sills, chassis and mounting points with pull out ramp extensions to suit varied wheelbase.

A full height lift, this substantial platform scissor weighs in at 986 kg and runs off a 240v single phase 20A supply, a 3 phase motor can be specified, if required. A full air operated safety system is employed and the lift has CE certification including anti knock valves and photocell protection

This lift raises 3000 kgs to 1.83m affording full standing access under a vehicle. A 3500 kgs model is also available

The Galton is not a mobile unit but does not require any alterations to the workshop floor, this lift is designed to be secured using foundation mounting bolts through baseplates, with only a single pipe connecting cover providing unobstructed centre access.

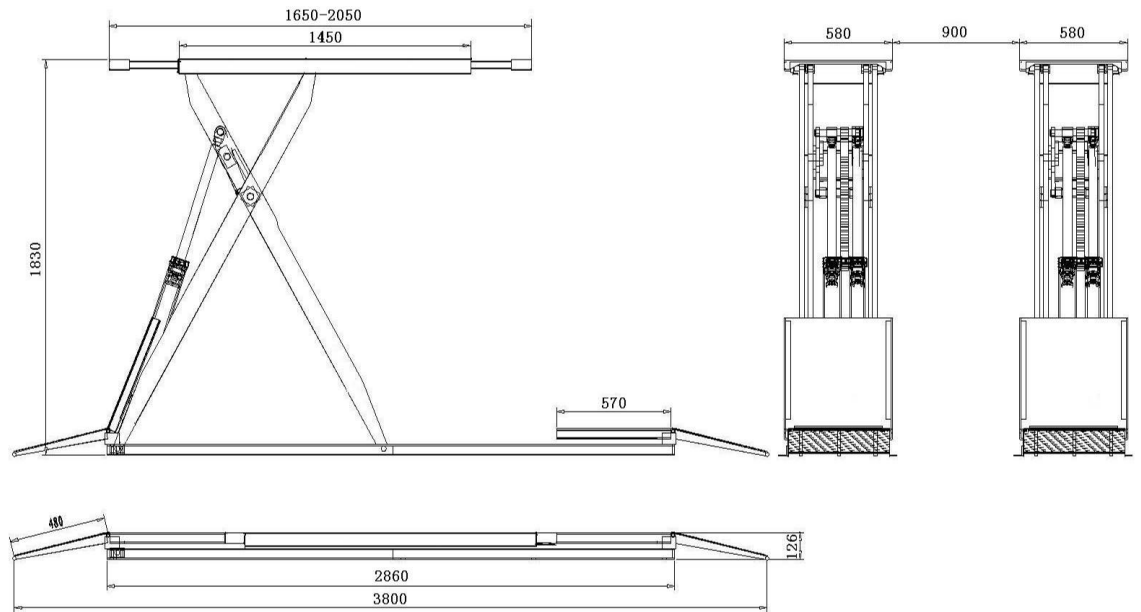

This is a drive on professional scissor, quick to lift, 55 second up time, 70 seconds to lower. The Galton is manufactured using the best quality dual hydraulic rams and pumps.

Specifications

Capacity	3000 kg
Max. Lift Height	1830 mm
Platform Length	1450 mm to 2050 mm
Overall Width	2120 mm
Overall Length	3840 mm
Minimum Height	125 mm
Ramp Width	580 mm
Gap between ramps	900 mm
Up-ramp Length	470 mm each
Lift Weight	986 kg
Required Air Pressure	6 — 8 kg/cm ²
Motor	240V single Ø
Supply needed	20 A wired connection
Circuit breaker	32 A D rated
Locking mechanism	Air
Motor	Optional
380v 3Ø	

Galton Dimensions

The Most Flexible Secure Lifting

Galton lift supplied, as standard, with adjustable length ramps to accommodate varied wheelbases and standard rubber lifting blocks to raise a vehicle. A photocell ensures ramps are raised level.
