

Strongman Tools

# HyJacks

## vehicle positioning skates

Lifts 680 kg

Excellent build quality

**Move cars, vans, boats, trailers, caravans, light aircraft.....**

Hydraulic action

Simple and dependable

**Strongman Tools HyJacks are hydraulically operated vehicle positioning skates. Whether accident damaged, being serviced, repaired or restored, immobilised or just inconsiderately or illegally parked – if it needs to be moved then HyJacks are a quick and easy solution.**

**These handy tools allow you to move just about any vehicle, even with flat tyres or damaged rims...**

**No more lifting or “bumping” a car out of the way. Quickly place a HyJack around each wheel, pump up, and simply push the vehicle to a new position – without any damage .**

**The reliable mechanism is solid and built to last.**

## Simple and Easy to Use

Place HyJack Around Wheel

Close the valve

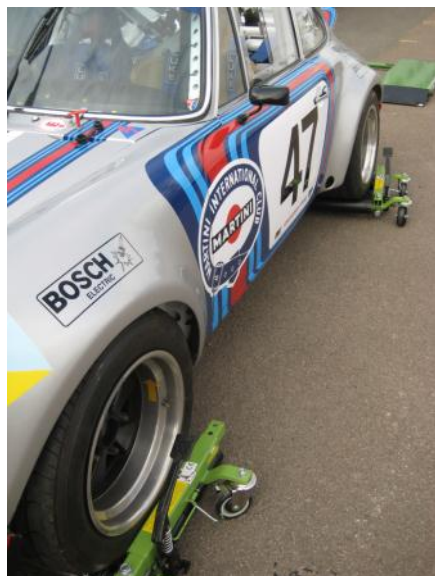

Use foot pump to raise wheel

Pin HyJack for safety

Move the Car

HyJacks come into their own when you're stuck for space. If you want to turn a vehicle on its axis, want to squeeze them together in a small garage or push a heavy car around to just where you need it in the workshop or pits.....

HyJacks are the solution

Keep your HyJacks secure and handy, a stand keeps them together, tidy and ready for work.
